Re: Comments on REVISED Draft EIS Docket CP15-558-000 – Proposed PennEast Pipeline Project

Dear Ms. Bose:

Route modifications and additional information submitted recently by PennEast on November 23rd and 28th provide insufficient time to address these changes. For example, heavy haul routes that directly affect our City of Lambertville were submitted to the Federal Energy Regulatory Commission (FERC) on November 23 with the latest comment period closing December 5th – giving just 5 business days to analyze these impacts. This is unacceptable and appears to be deliberately evasive. This process does not afford our residents and businesses the opportunity to appropriately review the information and prepare a comment. To ensure all engaged parties have the opportunity to respond to the data PennEast has been asked to provide by FERC within 20 days (or justify a delay), we respectfully request an extension to the comment period to at least 30 days after PennEast has provided final responses to FERC's Environmental Information Request from November 7th, 2016.

Once again, we urge you to extend the comment period to at least 30 days after PennEast responds in full to FERC's Environmental Information Request of November 7th, 2016 to give engaged intervenors an opportunity to comment on the most recent changes.

Respectfully Submitted,

The Pipeline Committee of the City of Lambertville
