SUEZ SETS SCHEDULE FOR FALL 2020 WATER MAIN AND FIRE HYDRANT CLEANING IN LAMBERTVILLE

Program Will Help Ensure Efficient Fire Flows and Maintain Water Quality

SUEZ today announced that it is scheduled to begin fall water main and fire hydrant cleaning in order to maintain high water quality for Lambertville residents. The program will begin on or about Tuesday, October 13 through about Friday, October 23, 2020, weather permitting. SUEZ crews are scheduled to flush individual developments during the day from 9 AM to 3:30 PM and downtown areas at night from 9 PM to 6 AM. The project will be completed during the work week, and there will be no weekend flushing. The following is a comprehensive list of areas SUEZ crews will flush within the City of Lambertville during this program:

October 13, 2020 – Lambert Hill Development (day time flushing)
October 14, 2020 – Calton Homes Development (day time flushing)
October 15, 2020 – Woodcrest Homes Development (day time flushing)
October 19 – 23, 2020* – Downtown Areas, City of Lambertville (night time flushing)

“Fire hydrants are essential in providing water for fire protection and also serve a critical role in ensuring that SUEZ customers receive quality water service within their homes and businesses,” said Jim Mastrokalos, Director of Operations. “Removing sediment build up in hydrants and the water mains not only sustains good quality drinking water but also improves carrying capacity within the pipes and ensures reliable use for fire protection,” he added.

Mastrokalos added that the program, critical to the overall maintenance of the distribution system, should not disrupt service, and all residents and businesses will be contacted by SUEZ’ auto notification system at least 24 hours prior to the start of the project in their respective communities.

During the program, customers may experience temporary incidences of low pressure or volume and slight discoloration or cloudiness of tap water. It is recommended that customers check clarity by running a cold tap for several minutes, which allows new water to work its way through the pipes.

If residential and business customers observe SUEZ crews working on streets where their homes and offices are located, the company advises not to use tap water, washing machines or dishwashers until the brief activity is completed. Customers may wish to fill up clean bottles or containers with tap water ahead of time and store them in the refrigerator to use for drinking or cooking while the program is conducted in their area. Customers are also asked to be attentive while driving near SUEZ trucks and crew members to ensure safety.

For additional information, customers may visit the company website: www.mysuezwater.com and social media channels. Customers with questions or concerns may call SUEZ at 877-565-1456.

*Scheduled flushing Southside or South of York Street on October 20, 2020; Scheduled flushing Northside or North of York Street on October 21, 2020. Weather permitting.

About SUEZ North America:

SUEZ North America operates across all 50 states and Canada with 3,000 employees dedicated to environmental sustainability and smart and sustainable resource management. The company provides drinking water, wastewater and waste collection service to 6.7 million people on a daily basis; treats 560 million gallons of water and 460 million gallons of wastewater each day; delivers water treatment and advanced network solutions to 16,000 industrial and municipal sites; processes 160,000 tons of waste for recycling; rehabilitates and maintains water assets for more than 6,000 municipal and industrial customers; and manages \$4.1 billion in total assets. The company posted revenues of \$1.1 billion in 2018 and is a subsidiary of Paris-based SUEZ.

About SUEZ:

Since the end of the 19th century, SUEZ has built expertise aimed at helping people to constantly improve their quality of life by protecting their health and supporting economic growth. With an active presence on five continents, SUEZ and its 90,000 employees strive to preserve our environment's natural capital: water, soil, and air. SUEZ provides innovative and resilient solutions in water management, waste recovery, site remediation and air treatment, optimizing municipalities' and industries' resource management through "smart" cities and improving their environmental and economic performance. The Group delivers sanitation services to 64 million people and produces 7.1 billion m3 of drinking water. SUEZ is also a contributor to economic growth, with more than 200,000 jobs created directly and indirectly on an annual basis, and a provider of new resources, with 4.2 million tons of secondary raw materials produced. By 2030, the Group is targeting 100% sustainable solutions, with a positive impact on our environment, health and climate. SUEZ generated total revenue of €18.0 billion in 2019.
