

PENNEAST PIPELINE COMMITTEE OF THE CITY OF LAMBERTVILLE

8am Meeting 2nd November 2016

Lambertville City Hall, York St

Agenda

8.00 Update/how Lambertville can have impact

Marlene Dooley from DRCC

She reports to commission that reports to the governor. 8 public members. The 2-3 engineers . They have aesthetic authority. On a public path. The commission meets once a month.

Princeton University, New Brunswick, Bulls Island. Feeder part of the canal. Trenton to New Brunswick. Prawlsville Mill in Stockton. Nine members along the canal.

We have to be able to regulate something with this kind of impact. Pipeline is going through the canal. Review zone Goes far up to go under. Canal commission asked PennEast to come before it. Siad no, there had been other meetings. Canal commission has been submitting comments. PennEast's response said they had no jurisdiction. We'e stayed away from whether we have permitting ability. These are C1 streams. High level streams that go into the park. STormwater issues From her standpoint, the line keeps shifting.

STORAGE AND ZONIING

EQUIPMENT ISSUES. CONSTRUCTION PERMITS? WHERE ARE THEY GOING TO STORE EVERYTHING.

WE'VE HEARD THEY ARE GOING TO STORE ON 179. WE'll do this for the town.

Possibly writing each town?

NJCF contacted them a lot with townships.

---Allison Mitchell

STREAM EASEMENTS? It's not really a permitting authority. Just for mitigation. NOT GOING TO MEET WITH PENNEAST PIPELINE.

DRCC with the NJ Water Authority (NJDEP). IN charge of water. They regulate the canal as a reservoir. That's how the money comes. Why there is always water in the canal. They regulate development around the canal. Supplier to Suez.

MAYOR DAVE: WHAT IS IT WE NEED TO WATCH FOR TO GET YOU INTO POSITION TO GIVE OU AUTHORITY? Can we regulate the pipeline in small ways? DO they have to place generators or place pads? Could be a trigger for us. Another hurdle

Could they go ahead while a permitting process is going on? DEP is still reviewing it. Did DEP issue any permits yet?

HISTORIC CEMETERY on ROCK ROAD...Information to State Historic Office? Linking it back to a makeshift hospital next to Nicola's pizza. WHO IS THE CONTACT AT SHPPPO--Kate Marcopul. Who is keeping all of the comments on FERC?

NJCF -- Alix Bacon and Allison Mitchell

Lambertville is the highest area of regulation.

Minor and major projects in the region.

Walls on Clinton street.

Interaction

DRCC TAKE HOME: monitor other town governments to see what approvals are ultimately needed.

IF we were proactive about it, we might be able to speed up the process. If we know that they need a certain permit.

GET COMMENTS FROM DRCC --THEY ARE AN INTERVENOR

STORAGE OF EQUIPMENT om 179?

They have regulatory standards and the filing before them. In house engineering staff. (VINCE MEZZA)

SUEZ-will talk to water authority. Arsenic in the rocks.

Marlyn will send a copy of comments. Stormater comments.

Streams that go directly into the canal. The impacts it would have and could be carried down with the streams and what impact that would have.

8.20 Residents meeting on 10th November

- Review message to be sent to residents Judy Carrol Detrano
- mailing lists
- outline agenda and presentation Sue Begent
- Suez attendance/FERC DEIS content Ward

JUDY TO SEND NOTICE TO WARD AND CINDY
--IT WILL ALSO GO OUT TO THE LISTSERV

--PUBLIC ANNOUNCEMENT (Official notice for meetings)
--CITY OF LAMBERTVILLE FB PAGE OFFICIAL LANGUAGE (VET WITH SUEZ)
--JUDY SENDS TO HER GROUP.

8.40 Review/approve Town banners Judy

8.45 Update on meeting/contacts with DEP/ratepayers council/EPA Ward

Ward talked to Suez

SUEZ--They will give their Concerns the've given. Security issues about explicit location. He wanted reassurance.

Ruth:

8.50 Prepare for meeting with US Fish and Wildlife 3rd November Dave

8.55 AOB

9.00 close
